## NOTE BY THE MULTI-FACED AUTHORS

*This book does not contain a bibliography since all the thoughts, shared in the book are mostly confessions and Exclamations, which the authors have extorted from the terrified Starry heaven – the heaven terrified by the Unbridled freedom of Mind!*

*Another reason for that ugly lack of vast sources of information and references like in “Docta Ignorantia” (Learned Ignorance”, Nicolaus Cusanus), is that the authors are undoubtedly influenced by culture and science as a whole, and to them to cite and quote means to quote all the scientific knowledge, which would be ridiculous and impossible.*

What we are facing is not a single treatise, but several works, which refute each other. Every manuscript is backed by a personality who is an idea that has come to life.

Here Ideas clash insofar as the lives of the personalities who represent them disagree with each other.
