

Under the pressure of the impulse of Asymmetry these primordial energetic Eidoses dissociate to secondary non-thinking Energy and secondary non-energetic Thought.

Objective Psyche, being continuum of Energetic Eidoses and Energetic Signs is the underlying reality of the Universe.

Self-divergation □ self-disintegration: Objective Psyche of the Universe self-diverges and self-disintegrates to Objective Platonic World (which is the world of non-energetic Forms-Ideas) + Objective Energetic Worlds (which is the World of formless Energy □ omnidirected □ non-local Energy)

Objective Energetic World is a combination of continuum of formless omni-directed non-local Energy and continuum of mirroring of abilities of Objective Psyche: Objective psychic ability of Objective Psyche mirror themselves in the energetic world this way the energetic world becomes the treasure of Objective Memory, Objective Fantasy and Objective Emotions.

Objective energetic world (as self-dissociated World Quantum) self-dissociates to the two Quantum Realms: the realm of quantum non-energetic Forms plus the realm of quantum formless Energy. The realm of quantum formless Energy separates and autonimates as the World of Subjective Physics. The realm of quantum non-energetic Form separates and autonimates as the World of Subjective Psyche. Objective Psychic abilities of the Objective energetic world mirror themselves into the Subjective psychic abilities: Subjective Memory, Subjective Intellect, Subjective Emotions, and so on. Thus, Objective energetic world self-diverges and self-divides to the World of Subjective Psyche (which is subjective mental world) plus the World of Subjective Physics, which are both quantum worlds.

Subjective Physics and Subjective Psyche stand in mutual bisection and coordination to each other □ where to every point of the Subjective Psyche corresponds to a respective point of Subjective Physics; and to every dynamic within Subjective Psyche corresponds a respective dynamic within Subjective Physics. But both worlds are subjective and quantum worlds.

These two worlds, being in bijective coordination and unifying their efforts, project one common picture of their togetherness and unity, which appears to our senses as the macroscopic familiar world. Therefore the macroscopic sensorial world is only a synthetic projection and projective image of both associated world of Subjective Physics and world of Subjective Psyche.

Our macroscopic familiar world which we call physical arises as a result of the extra objectivation and projection of Subjective Psyche and Subjective Physics. But in order to project their common image onto the screen of our senses, both worlds need the condition of the □ Reduction of Wave function □. Before experiencing reduction they cannot provide their projection because staying within the ontology of quantum state they are Possibilistic quantum worlds.

When they enter into association, the macroscopic familiar world is born. Exactly the association of these two quantum worlds is caused by the notorious Reduction of Wave function.

Self-convergence and restoration: It is necessary for the world of the Subjective Psyche and the world of Subjective Physics to get together in order to restore, by convergence, the Objective energetic world. It is necessary for the Objective energetic world to converge

### **EXPLANATION OF THE SCHEME OF OBJECTIVE PSYCHE, SUBJECTIVE PHYSICS AND SUBJECTIVE PSYCHE**

Platonic Ideas are not primordial, but secondary. They are non-energetic Eidoses born by self-disintegration of something higher and primordial to them: Beginningless primordial energetic Eidoses-Signs, in which Energy and Information (Semantics, Cogito) exist within one unbroken wholeness, as a continuum of energetic Forms-Ideas and thinking Energy.

with the Objective Platonic world, in order to restore the Objective Psyche of the Universe, which is the world of energetic Ideas and energetic Signs.

Subjective mental-psyche world cannot return alone, without Subjective Physical world into Objective Energetic world.

Subjective Physical world cannot return alone, without Subjective mental world into Objective Energetic world.

Objective Platonic world cannot return alone, without Objective Energetic world into Objective Psyche of the Universe.

Objective Energetic world cannot return alone, without Objective Platonic world into the Objective Psyche of the Universe.
